***Election/Restrictions***

1. Claims 1, 25, 30, 35 and 38 are generic to a plurality of disclosed patentably distinct species comprising different chemical structures. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Susan Doughty on 7/13/2003 a provisional election was made with traverse to prosecute the invention of compound 1401 on page 25, which reads on Claims 1, 12, 15 and 20-24. Affirmation of this election must be made by applicant in replying to this Office action. Claims 2-11, 13-14, 16-19 and 25-40 have withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 112***

4. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The host MX 6111 should be clearly defined.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 12 and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 7-309858.

The reference discloses an optically active compound having lactone group shown in Formulae I and III. The reference compound is suitable for a ferroelectric chiral liquid crystal element. The preparation of the reference compound is disclosed from sections [047]-[049]. Particularly, see the compounds 245-246, 248-250 and 253-255, which have fluorinated side group as the present claim. The concentration range of the reference compound used in liquid crystal composition is from 1-40%. See section [0100], which the optically active compound is 5% in liquid crystal composition. Also, see sections [0161] and [0167]. The reference anticipates the claimed invention. Regarding to claim 23, the reference also inherently anticipates the claimed invention because the reference

comprises the present optically active compound and the host mixture used in ferroelectric liquid crystal composition.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 7-309858.

The reference differs from the claim in that the claim has same number of m and n. Because the notations h and i in group (v) on page 4 are from 1 to 10 and 0 to 7, respectively, it would have been obviously to those skilled in the art to select the same number for m and n to arrive at the claimed invention.
